INDEPENDENT DEVELOPMENT PROJECTS

- **Personal Site:** A work in progress that currently displays understanding of HTML, CSS, JavaScript, and SQL. Growth of the site follows the growth of the developer.
- **StoreFront**: Created a secure application for managing product data. Application is built to simulate an online store front with a shopping cart. Administrators have the ability to manage product, category and vendor data.
- **S.A.T. Scheduling Administration Tool:** Created a secure application for managing product data. Application is built to simulate an online class scheduling system. Administrators will have the ability to manage students, courses, scheduled classes, and enrollments.
